PROJECTS

Intra Share

An internal Post sharing (Social Media) **MERN** app for an Organisation/College.

- This app will run only on **one organisation/college's network** to prevent outside users.
- Users can register themselves by giving their E-mail and they should be stay connected to their organisation's network to use the app.
- I created this responsive Web App using **MVC** architecture for better code organization and for easy future modifications.
- User can follow other users, like and comment on their posts

ReactJs, NodeJs, MongoDB, Express

My ChatRoom

A group chat application created using Socket.io, React.js and Node.js.

- There are **5 different chat rooms** available to start chatting.
- This application is useful for a short discussion with some group members. We don't need to create a Social Media group for such a small period.
- Users can join the chat using the given link by providing their username.
- To establish connection between user and server I used **Socket.io**.

ReactJs, Socket.io, Node.js, Bootstrap

Portfolio Website

A personal website to let people know about me.

- A responsive website which is compatible for all type of devices.
- All my achievements, educational background and projects are mentioned.
- Users can contact me by typing their message and mail address in contact form.

HTML, CSS, JavaScript, Vanta.js
